

An individualized assessment, development of an educational plan and periodic reassessment between participant and instructor(s) will direct the selection of appropriate educational materials and interventions.

Applicant Notes:

[illegible]

► **ASSESSMENT FORM**

Instructional team develops an individualized educational needs assessment process and form for documentation. Indian health facilities may use a standard IHS form, formatted PCC form or approved medical record form. All forms must include information on relevant medical history, cultural influences, health beliefs and attitudes, diabetes knowledge/skill, readiness to learn, preferred learning methods, barriers to learning, family support and financial limitations.

LEVEL 1

developmental

(checklists on pages 71 and 87)

► **ASSESSMENT FORM**

Instructional team adopts an individualized educational assessment process and standardized documentation form. Instructional team uses the educational assessment as the basis of all educational plans, interventions and educational material selection. Instructional team periodically reassesses individuals in the program.

LEVEL 2

educational

(checklists on pages 71 and 87)

► **COORDINATED DIABETES CARE AND EDUCATION**

The multidisciplinary diabetes care and education team uses case management, or other organizational diabetes best practice systems, to coordinate the ongoing diabetes care and education needs of individuals on a consistent basis.

LEVEL 3

integrated

(checklist on page 87)
